tibocath™

Hydrophilic Urinary Catheter

- ☞ Smooth at insertion and withdrawal
- ☞ Extended dry-out time up to 12-18 minutes
- ☞ Medical grade PVC (Phthalates free)
- ☞ Insertion without touching the catheter
- ☞ User friendly

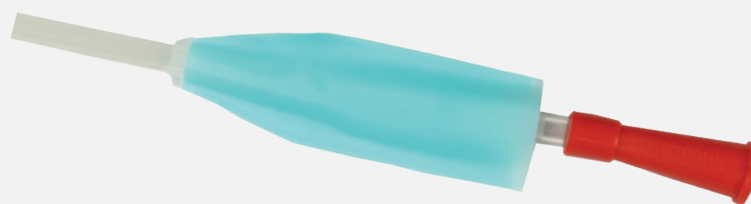

Tibocath™ is a perfect solution for Clean Intermittent Catheterization (CIC). This state-of-the-art catheter system provides both comfort and safety to the users.

The **Tibocath™** catheter is made of the Phthalates free PVC, has vertically cut and softly rounded eyes and cylindrical Nelaton tip.

Tibocath™ catheter surface is coated with PVP (Polyvinylpyrrolidone). This silky hydrophilic coating provides a fast and homogenous hydration with high sliding quality.

- Offers minimum friction compared to other traditional lubricated catheters
- Minimizes the risk for urethral abrasion
- Antibacterial
- Ready to use within seconds
- Dry-out time up to 12-18 minutes
- High biocompatibility

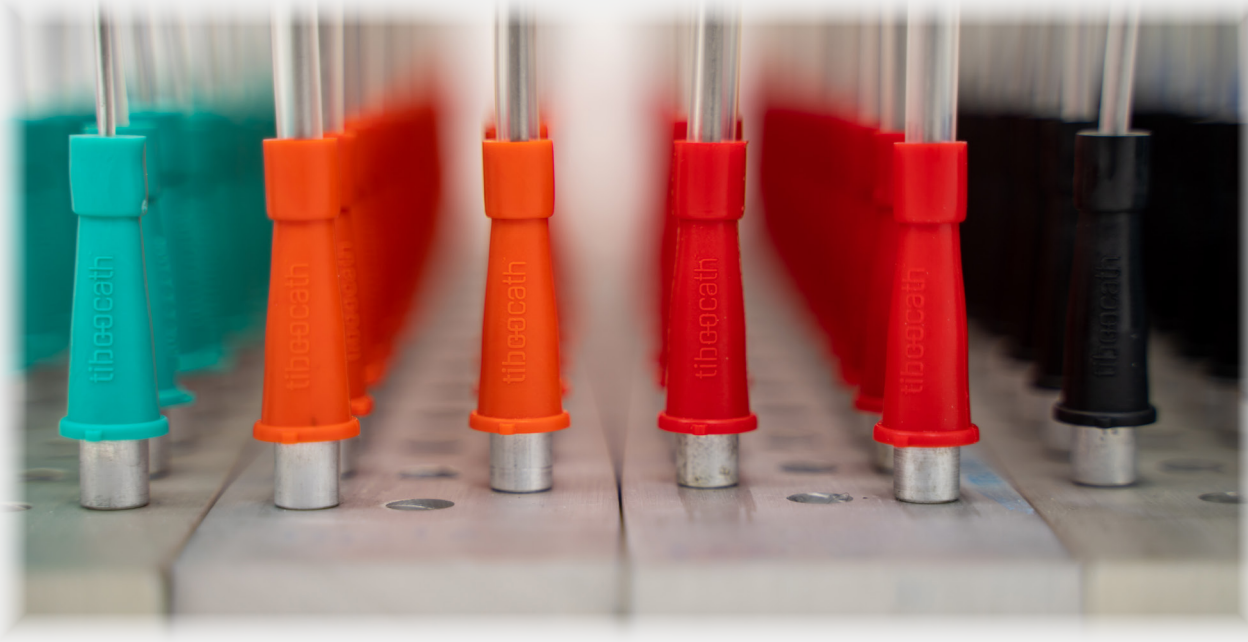

Tibocath Hydrophilic Urinary Catheter With Water Sachet

- Compact packaging contains all necessary components
- One squeeze opens the water sachet and the water reaches the catheter, activates its hydrophilic coating
- The blue protective catheter sleeve allows hygienic insertion of the catheter without touching it.

Tibocath Hydrophilic Urinary Catheter Kit

- Compact packaging containing all necessary components:
 - Coated catheter with connector
 - Water sachet
 - Urine collecting bag (800 cc)
